

Make sure your truck fits into these basic shapes. These simple shapes will help you check yourself as you put in your light and shadow.

Look at your ball as if it has bands of shadow around it. The closer the surface is to the light, the brighter it will be.

To place the muzzle and eyes on the sphere in the right place, draw an imaginary center line both vertically as well as horizontally.

First draw the basket as a cube. Then pull in the bottom of the basket from the edge of the cube. Erase the first guidelines and continue with your drawing.
